**MAURITZ.MAJELYNE@HOTMAIL.COM**

**347-421-3454**

**Cybersecurity Professional.** Able to design and implement disaster recovery plans, map out network topologies, and aid in hardening systems to protect them against possible threats and malware. Has experience using software such as Kibana, Wireshark and Security to monitor and analyze logs, data, and network traffic to spot potential threats. Skilled at resolving hardware/ software connectivity issues and setting up firewalls and backup systems. Known as attentive listener, fast learner and highly coachable. Trilingual English/ Dutch/ French. CompTIA A+ and Security + certified

**Software:** Kali Linux, Ubuntu, Windows Server, Splunk, Metasploit Microsoft Azure, Virtual Box, Wireshark, Kibana, Logstash, Docker IO, Autopsy, Security Onion, Snort, iOS, Android.

**Networking** Configuration; virtual private network; mapping network drives; Install workgroups, configuring virtual machines and setting up a virtual network (including a load balancer, and firewalls) in a Microsoft Azure environment.

**PC Maintenance/Hardware:** Operating system installation, Windows Update, system restore, disk cleanup, disk defragmenter, installation of anti-virus, anti-spy-ware software, firewall, filetransfer settings, configuring computers, removing viruses, Trojan, spyware, malware infections. Partitioning and Formatting Hard Drives..

## Education

***Cybersecurity Bootcamp, Security + Certification, Columbia School of Engineering***

May2022 - August 2022

*Course Projects:*

- *Discovered target machines and vulnerable servers on the network using Nmap.*
- Exploited vulnerabilities on several target machines and executed a “find the flags” mission.
- Cracked and brute-forced passwords using software such as “John the Ripper” and “Hydra”.
- Conducted forensic research and analysis of an iPhone image using Autopsy.

***IT Support Training, A+ and Network+ Certifications, Google IT support, Per Scholas.***

September 2021- December 2021

*Course Projects:*

- Disassembled and reassembled a PC, verified its successful boot
- Created a bootable thumb drive using various platforms such as PowerISO and Rufus
- Tested wall outlets using a multimeter and ensuring the outlet output the correct voltages
- Configured a Linksys router adjusting SSID and enabling the WPA2 security protocol

## Professional Experience

**Compulink** May 2022 - Current

**IT Support Specialist/contractor/consultant**

- Image and deploy approx. 334 workstations with Windows 10 for the NYC DODC using PXE boot.
- Deploy and set up workstations, CAD workstations, monitors, and peripherals around the office.
- Ensure all workstations are properly connected to the Active Directory Domain.
